

MINUTES OF MEETING

Module: Software Engineering I Project (CSS37W1)

Phase: Phase 3 – Features, Scenarios, and User Stories

Date: 21 April 2026

Time: 14:20 PM

Duration: 31 minutes

Platform: Microsoft Teams

1. Attendees

- Lloyd Thabiso Khuphe
 - Thabiso Besutfu Andrew Nkambule
 - Rialivhuwa Kurhula Makhado
 - Ayanda Dunywa
 - Siphokuhle Wellem
 - Khanya Mzila
-

2. Purpose of the Meeting

The purpose of the meeting was to discuss and align on **Phase 3 requirements**, focusing on:

- Feature identification
 - Personas and user scenarios
 - User stories
 - Requirements mapping
 - Task allocation and deadlines
-

3. Key Discussion Points

3.1 Understanding Phase 3 Objectives

- The team agreed that Phase 3 focuses on **user-centred design**.
- Main goal: translate the project idea into:
 - Features

- Personas
 - User stories
 - Scenarios
 - Emphasis on aligning all components with **user needs and system functionality**.
-

3.2 Difference Between Personas and User Stories

- **Personas:** Represent different types of users (e.g., students, staff, visitors).
 - **User Stories:** Describe what users want using the format:
 - “As a [user], I want [goal] so that [benefit].”
 - Clarified that:
 - Personas describe *who the users are*
 - User stories describe *what they want*
-

3.3 Feature Identification

- Initial features discussed:
 - Student card (wallet functionality)
 - Campus map
 - Notifications
 - The **printing feature** was removed due to complexity.
 - Agreement to:
 - Refine and simplify features
 - Ensure feasibility within project scope
-

3.4 Database Decision

- Decision made to use a **dummy database** instead of real university systems.
- Reason:
 - Avoid risks related to real user credentials

- Focus on demonstrating system functionality
 - Plan:
 - Users will input sample credentials
 - System will simulate real-world behavior
 - Future possibility:
 - Integration with real systems if adopted by the university
-

3.5 Personas and User Scenarios

- Identified possible user groups:
 - Students
 - Staff
 - Visitors
 - Plan to create **2–3 personas** with realistic details.
 - Scenarios will describe:
 - How users interact with the system in real situations
-

3.6 User Stories

- User stories will be:
 - Derived from personas and scenarios
 - Written from the user's perspective
 - Existing backlog stories will be reused and refined.
-

3.7 Requirements Mapping

- Clarified that requirements mapping involves:
 - Linking features to:
 - Functional requirements
 - Non-functional requirements
- Ensures consistency between:

- Features
- User stories
- System requirements

3.8 Alignment Requirement

- Important note:
 - All components must be linked:
 - Features ↔ Personas ↔ User Stories ↔ Scenarios
- Ensures a **coherent and logical system design**.

4. Task Allocation

Task	Assigned Members
Feature Identification	Ayanda Dunywa, Thabiso Nkambule
Personas & Scenarios	Rialivhuwa Makhado, Siphokuhle Wellem
User Stories & Requirements Mapping	Lloyd Khuphe, Khanya Mzila

5. Deadlines

- **Phase 3 completion target:** 23 April 2026
- **Final deadline (all phases complete):** Sunday (before submission)
- **Official submission deadline:** 26 April 2026

6. Action Items

- Refine and finalize feature list
- Develop 2–3 detailed personas
- Write user scenarios based on personas
- Create user stories using correct format

- Map features to functional and non-functional requirements
 - Upload all documents to GitHub:
 - features_list.md
 - personas_and_scenarios.md
 - user_stories.md
 - requirements_mapping.md
 - Update GitHub Project Board regularly
-

7. Additional Notes

- Team emphasized **equal participation and active collaboration**.
 - Members encouraged to stay active on GitHub and contribute consistently.
 - Meeting recording will be saved and used for documentation purposes.
-

8. Conclusion

The meeting successfully clarified Phase 3 requirements, aligned the team on tasks, and established deadlines. All members agreed to complete their assigned tasks within the given timeframe to ensure timely submission.

9. Meeting Adjournment

Time: Approximately 14:51 PM

Minutes Compiled by: Thabiso Besutfu Andrew Nkambule
